

BE GREEN

SMALL ACTIONS TO PROTECT THE PLANET

DID YOU KNOW?

1 tonne of sorted paper/cardboard packaging saves 1410 kg of wood and 48.20 m³ of water. Then please help us to protect our planet and its resources by sorting your waste. It's a quick and easy action that can have a huge impact on our environment.

RECYCLING BIN

Paper, magazines, flyers...

Plastic bottles and flasks

Metal packaging

Cardboard and plastic packaging

Aluminium

Plastic or paper bag

The black bin is used for non-recyclable waste

CONTRIBUTE TO SAVING WATER AND ENERGY

Maximum room temperature set at 22° in winter and minimum temperature set at 22° in summer. Within reason, reduce your water consumption during your stay.

When you hang your towels for reuse, you help preserve our planet's natural resources. If you desire new towels, simply leave used towels on the floor. We will be happy to refresh them. We are delighted to change the bedsheets every three days. If you would to have them changed daily, please let us know.
